**C A R E E R S U M M A R Y**

*Peter has spent over thirteen years in the building inspection industry as a respected and decorated professional having personally completed over six-thousand property inspections and over one-thousand energy audits. His success is driven through his ongoing commitment to continued education. Peter recognizes the need to stay up to date with the current environmental, technological and market cycle trends in the industry. In 1999, he made a strategic decision to focus on energy conservation and the global need for solutions. It was this focus that was instrumental in the opening of SoCal Infrared and subsequently the national resource of United Infrared.*
